### **DETAILED ACTION**

### Election/Restrictions

1. Claims 22, 24-27, 29, and 37 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11/22/04.

- 2. This application contains claims drawn to an invention nonelected with traverse on 11/22/04. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
- 3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### **Priority**

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

## Claim Objections

5. Claims 15, 23, 28, and 30 are objected to because of the following informalities: line 7, "the" (last occurrence) should be changed to --a--. Appropriate correction is required.

Application/Control Number: 09/763,988

Art Unit: 2621

## Claim Rejections - 35 USC § 103

Page 3

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 8. Claims 15-18, 23, 28, and 30-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura et al (6,185,312).

Nakamura et al, in Figures 1-12 and 27-49, discloses a method for embedding and reading watermark-information in digital form, and apparatus thereof that is substantially the same method and system for embedding additional information in video data as specified in claims 15-18, 23, 28, and 30-33 of the present invention, the system comprising means for detecting a video frame in the video data from a video data stream (Fig. 5); means for extracting data for a small domain from the detected video frame and for buffering the data 116; means for embedding part (e.g. sub-

Art Unit: 2621

information) or all of the additional information 121 in the buffered small domain data without changing the length of the video data stream (Fig. 6); and means for returning the small domain, in which the additional information has been embedded, to the video data 125.

With respect to claims 16-18, 23, 28, and 30-33, the video data of Nakamura et al is MPEG video data; the video frame is an intra-macroblock of an I-frame, or of a P or B-frame (i.e. MPEG GOPs); the means for embedding the additional information includes means for detecting a DC factor in the buffered small domain (e.g. DC component of coefficient); means for determining whether the bit length of the DC factor will be unchanged even when the additional information has been embedded 124; and means for embedding the additional information in the buffered small domain, when the bit length will be unchanged 123.

It is noted Nakamura et al differs from the present invention in that it fails to particularly disclose alternative embedding options where the embedding of all the additional information is determined to change the length of the video data stream. However, Examiner takes Official Notice that such embedding option based on the determination whether the embedding of all the additional information will change the length of the video data stream is notoriously well known in the art.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made, having the reference of Nakamura et al before him/her, to exploit the other available area of a video frame (e.g. vertical and horizontal sync

interval), in order to embed additional data yet not change the length of the video data stream.

9. Claims 38-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura et al (6,185,312) in view of Yamane et al (6,393,196) for the same reasons as set forth in Section 4 of the last office action, dated 11/28/05.

# Response to Arguments

10. Applicant's arguments with respect to claims 15-21, 23, 28, 30-36, and 38-42 have been considered but are moot in view of the new ground(s) of rejection.

## Allowable Subject Matter

- 11. Claims 19-21 and 34-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 12. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

### Conclusion

13. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Application/Control Number: 09/763,988 Page 6

Art Unit: 2621

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. Lee whose telephone number is (571) 272-7334. The examiner can normally be reached on (571) 272-7334.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on (571) 272-7950. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
